

SoftGloss MAXX

Gentle, yet powerful
five-brush clean

A proven success in the car wash industry, SoftGloss MAXX is a wash your clients will return to time and time again. You won't find its combination of features and benefits from anywhere else but Ryko. Equipped with our patented FoamBrite wash material, SoftGloss MAXX offers a safe, thorough clean that will send your customer satisfaction levels—and your sales—soaring.

FEATURES AND BENEFITS

The following features come standard on the SoftGloss MAXX:

- **FoamBrite-equipped cleaning arms** engulf the car for a top-to-bottom clean. This lightweight material is exclusive to Ryko and designed to deliver a detailed wash without worry of damage to the vehicle. The five FoamBrite-rotating brushes thoroughly clean vehicles in less time, maximizing your throughput and your profits.
- **Efficient chemical application** delivers uniform coverage of 360 CleanCut presoak, detergent and TriFoam wax.
- An **onboard computer** memorizes the profile of each vehicle as it goes through the wash for improved wash quality. Plus, a top-brush-interrupt feature prevents the top brush from dropping into the beds of pickup trucks where it could come into contact with debris and damage the truck or the machine.
- **Low-profile vehicle detection and tall side arms** ensure cars of all sizes—from minis to duallies—experience the same spotless clean.
- **A custom look** is easy to create with our standard colors of FoamBrite and body panels. Custom-colored body panels are also available.

PROFITABLE OPTIONS

Push your profits higher with any of these add-ons:

- **Wheel scrub** provides extra cleaning power where vehicles need it most.
- **ColorWave finishing curtain** delivers a customer-wowing light show that will set your wash apart from the competition. (Available in red, yellow or blue.)
- **Onboard dryers** allow your customers to relax while the machine uniformly dries their vehicles.
- **RainShield** protectant protects vehicle bodies and glass surfaces from corrosives, oxidation and UV rays while improving visibility, enhancing color and shine, and providing a water-repellant coating.
- **Water reclamation system** minimizes the amount of fresh, city water usage.
- **HP turbo wash** provides effective and appealing high-pressure cleaning of wheels and rocker panels.
- **Rotating rocker blaster and under-chassis wash** annihilate grime buildup.
- **Spot-free rinse** reduces contaminants to eliminate spots on vehicles.
- **Larger bay sizes** to accommodate duallies.
